

Originally designed with the photographer in mind, the heavy-duty use Professional has proven its durability and worth as an “all-day, everyday use” trimmer in a variety of industries. The Professional has been used to cut offset printing plates, packaging materials, polyethylene and even mount board- as well as for office finishing products.

The Professional is perfect for heavy-use cutting and trimming of flexible materials:

- Dual chrome-plated guide rails completely eliminate cutting head swivel.
- Design offers a maximum cut depth of up to 3mm.
- A solid laminated gridded baseboard ensures accurate placement of work.
- All-metal end frames and head, and an aluminum square side rule, lead to performance that lasts a lifetime.
- Self-sharpening Sheffield Steel cutting wheel.

The steel stand offers rigid support at the ideal working height of 34 inches. Black finished, this stand includes an integrated, transparent space-saving waste catcher that secures off cuts.
