### TEC and Ultimaker Announce 3D Printer School Winner!

*TEC Names the New England School Raffle Winner of an Ultimaker 3 3D Printer*

Concord, NH – December 18, 2018 – Technology Education Concepts, Inc. (TEC), an Authorized Ultimaker Reseller and Service Provider in Concord, NH, teamed up with Ultimaker North America to raffle off an Ultimaker 3 3D Printer to a school. We are happy to announce that **Kate Owen from Thetford Academy in Thetford, Vermont** is the winner!

TEC travels to several Academic Conferences each fall and spring representing Ultimakers and other STEM equipment to schools in New England. Educators at the fall conferences had the opportunity to register their school to win an Ultimaker 3 3D Printer by visiting TEC's booth and entering their name into the raffle. Over 700 educators entered for a chance to win.

Mr. William Bugg, Principal of Thetford Academy, was very pleased to hear that his school was the recipient of an Ultimaker 3 3D Printer. "Thetford Academy is thrilled to have won the printer in the recent raffle, and we are excited to be able to put it to good use for the benefit of our students. We have a small maker-space program already. The addition of the Ultimaker will help us expand our program and enable our students to quite literally make their concepts, their dreams, become reality," states Mr. Bugg.

Liz Arum, Education Strategist at Ultimaker North America, states "Ultimaker strives to enable educators with the tools they need to successfully implement 3D printing in classrooms of all ages. We are thrilled to support TEC, one of our leading educational partners, by providing Thetford Academy with an Ultimaker 3."

"We applaud all of the educators who put forth the effort to implement 3D printing technologies into their classroom and school," states Richard Amarosa, a former educator and Founder/President of TEC. "They are the advocates who bring opportunities to our young people and broaden their educational experiences."

This is the second year that TEC has collaborated with Ultimaker North America to offer a 3D printer raffle to schools in the region during the fall conference season. Last year's winner was James Genovese of Conard High School in Connecticut.
