

Core Electronics (110E)

Nida's Core Electronics program introduces DC, AC, Analog, and Digital subjects, intended to prepare a student for an electronics certification from ETA or CertTEC. The Model 110E Trainer, is ideally suited for High Schools and Colleges where advanced electronics subjects are not required. An advantage of the Model 110E is the reduced cost; however, the Model 110E is a single position system and won't support advanced topics that require a three-position trainer. If both basic and advanced subjects are required, refer to the Model 130ST Trainer.

| Core Electronics Model 110E Trainer | |
|--|------------------|
| Courseware | Card Sets |
| DC Circuits | Model 1401T |
| AC Circuits | Model 1402T |
| Analog Circuits | Model 1403T |
| Digital Circuits | Model 2105T |
