

Basic & Advanced Electronics (130ST)

Nida's Basic and Advanced Electronics program introduces DC, AC, Analog, and Digital subjects, intended to prepare a student for an electronics certification from ETA or CertTec. The Model 130ST Trainer is the premier, three-position, delivery platform for Nida's basic and advanced electronics subjects. This Trainer is used by all branches of the US military to support training of more than 50 specialty career fields. In addition to the military, the Model 130ST is used by high schools, colleges, universities, technical schools, and industry.

Basic & Advanced Electronics Model 130ST Trainer	
Courseware	Card Sets
DC Circuits	Model 1401
AC Circuits	Model 1402
Analog Circuits	Model 1403
Digital Circuits	Model 2105
Wiring	Model 1449
Motor Controls	Model 170
Transducers	Model 1405
Fiber Optics	Model 1406
Signal Processing	Model 1407
Phase Lock Loop	Model 1411
Introduction to Filters	Model 1418
Phone Systems	Model 1429
Microprocessors	Model 1440
Communications	Model 4444
Microwave	Model 3341
