Support

Ultimaker Cura Enterprise

The simplest and most seamless print preparation experience, packaged for deployment.

- Delivered in .msi format, it can be easily deployed throughout organizations using standard deployment tools
- Stable software supported for a year, with (major) releases twice a year, after community testing
- Continuous security improvements

Ultimaker Digital Factory

Manage your organization, user, and workflow remotely with powerful cloud-based tools

- Manage an organization by controlling who has access to printers and cloud services
 - Manage multiple 3D printers
 - Remote 3D printing, wherever it is in the world
 - Queue print jobs
- Optimize your workflow through detailed print analytics
- Share 3D printers with your team to effectively pool resources and optimize production

Ultimaker Marketplace

Securely customize your workflow with third-party material profiles and verified plug-ins.

- Download verified and secure plug-ins to customize your print preparation workflow
- Access print profiles from Ultimaker's Material Alliance to unlock limitless applications
- Synchronized account on any workstation
- Controlled workflow with plug-in installations only possible through Ultimaker Marketplace
- Most recent security assessment

Software Support *(Contact TEC, Inc. for hardware support)*

Direct assistance by Ultimaker technicians

- Knowledge base of more than 500 articles
- Direct Ticketing System submitted to Ultimaker, get a response Mon.-Fri. within 24 hours.
- Peer to Peer Support via the Ultimaker Community (40,000+)
