

VersaUV

UV PRINTERS AND PRINTER/CUTTERS

From On-Demand to Higher-Volume Customization We Have the VersaUV Solution For You

Expand your business, revenue and print possibilities with a choice of award-winning VersaUV print devices. Ranging from desktop machines for quick personalization of giftware and accessories to benchtop flatbeds for larger item and higher volume personalization, we have a device to suit your exact graphics customization needs.

VersaUV® LEJ-640

Hybrid UV-LED Flatbed Printer

Model	Sizes	MSRP
LEJ-640	64"	\$54,995 US

- Hybrid printer is compatible with roll-to-roll media and supports rigid material up to 1/2" thick, including 4' x 8' sheets
- Perfect for large sheets of Gatorfoam®, Fome-Cor®, corrugated cardboard and more
- Produce graphics with stunning varnish and embossed effects

VersaUV® LEC2-300

UV Printer/Cutter

Model	Sizes	MSRP
LEC2-300	30"	\$19,995 US

- Streamlined UV printer/cutter device for producing stickers, labels, packaging prototypes, and specialty graphics
- Low-heat LED lamps print on foils, BOPP, PET film, fabrics and more
- True Rich Color quality for unmatched vibrancy, color reproduction and detailed image quality
- An all-in-one device for embossing, creasing, perf-cutting and more

VersaUV® LEF2-300 Series

UV Benchtop Flatbed Printers

Model	Sizes	MSRP
LEF2-300	30"	\$29,995 US
LEF2-300D	30"	\$35,995 US

- Print directly on virtually anything including giftware, accessories and more
- Now available as the LEF2-300D with double the printable height for printing onto larger items
- Add special finishes, realistic textures, or 3D embossed effects to add a new dimension of "touch and color"
- Pair an LEF2 with an LV-290 or LV-180 laser engraver machine to laser cut and customize your own products—save over \$10,000
- Optional BOFA air filtration system for all units

CMYK + Gloss × 2 + White × 2

INK CONFIGURATIONS

CMYK + Gloss × 2 + White
CMYK + Gloss + White + Primer

Feel the Color with State-of-the-Art ECO-UV® Ink Printing

Direct print onto hundreds of different surfaces with the power of VersaUV technology and ECO-UV® inks—engineered for use on all applications and providing ultra-brilliant color results.

Print gloss/matte finishes, realistic textures, or 3D embossed effects to add another dimension of "touch and color."

Create your own special finishes or choose a texture pattern from our Roland Texture System Library.

Select VersaUV models include additional White ink and Primer ink for prepping glass, acrylic and other impervious media.

ECO-UV® inks are engineered for use on all applications— you don't need to purchase multiple ink sets for different media use.

VersaUV® LEF2-200

UV Benchtop Flatbed Printers

Model	Sizes	MSRP
LEF2-200	20"	\$21,995 US

- Print directly on virtually anything including giftware, accessories and more
- Add special finishes, realistic textures, or 3D embossed effects to add a new dimension of "touch and color"
- Pair an LEF2 with an LV-290 or LV-180 laser engraver machine to laser cut and customize your own products—save over \$10,000
- Optional BOFA air filtration system for all units

INK CONFIGURATIONS

CMYK + Gloss + White
CMYK + White × 2
CMYK + Primer + White

VersaUV® LEF-12i

UV Desktop Flatbed Printer

Model	Sizes	MSRP
LEF-12i	12"	\$17,995 US

- Compact UV flatbed for quick personalization of specialty items
- Add special finishes, realistic textures, or 3D embossed effects to add a new dimension of "touch and color"
- Perfect for pens, smart phone covers, personalized awards, giftware and so much more
- Optional BOFA air filtration system

INK CONFIGURATIONS

CMYK + Gloss + White

Easy, Efficient, and Advanced VersaUV Production

As well as featuring simplified controls and operating systems to make set up and printing a less complicated process, VersaUV printers provide advanced machine tools to ensure efficient graphics customization with exceptional results.

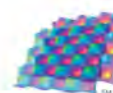

Low-heat UV-LED lamps instantly cure ink on the surface of media for a fast and easy graphics customization.

An Automated Ink Circulation System stops ink pigments from settling in the ink lines for even consistency.

Mist Filters catch the surplus ink that mists off the edges of your media to avoid overspray and keep ink from falling on internal components.

Control dot placement between each print pass for faster throughput and excellent image quality in all print modes with Roland Intelligent Pass Control.

Combine Laser Fabrication with Personalization

Create your own premium value items by cutting-out and engraving materials with a GCC LaserPro laser engraver and adding full-color graphics and gloss textures with a VersaUV LEF2 flatbed printer! Laser cut and print on acrylic, wood, and other materials and feature everything you need to start producing right away. Each device can be supplied with an air filtration unit and other essentials. Contact us for more info!
